August 2022, Washington DC - Logical Technology and Research (LTR), a management consulting firm specializing in IT services and solutions for government customers, will be a sponsor and exhibitor for the 2022 National HUBZone Conference, an event sponsored by the HUBZone Contractors National Council. The Symposium will be held August 31 through September 2 in Chantilly, VA. LTR was recently named an SBA-certified HUBZone enterprise. According to the HUBZone Council website, the “National HUBZone Conference is the largest HUBZone event, attracting hundreds of accomplished HUBZone small businesses from across the nation.” LTR is a member of the HUBZone Council and will have a booth at the exhibit, showcasing the firm’s experience and credentials with various information systems such as Geospatial, as well as expertise in IT Modernization, Machine Learning, and Artificial Intelligence.

LTR is sponsoring the virtual app for the HubZone Conference, a mobile application to provide HUBZone Council members and Symposium attendees access to conference information about the agenda, exhibitors, speakers, and participant points of contact. Todd Rogers, President and CEO of LTR, noted “The virtual app will make it easier to connect with other Council members, Symposium attendees, as well as prospective partners and customers. In this way, it is an extension of our corporate mission to link effective solutions – such as the app - to measurable results.” Mr. Rogers added, “LTR is grateful for the opportunity to be a part of the community of HUBZone enterprises and vendors through the Council, and to support that community through the sponsorship.” The agenda features training and educational webinars, exhibits and both onsite and virtual matchmaking sessions to introduce small businesses to prime contractors and government procurement officials.

Michelle Burnett, Executive Director of the HUBZone Council and convener of the conference, commented “The HUBZone Council is grateful for the generosity and support from our partners at LTR. Involved members make our HUBZone contractor network stronger. We look forward to seeing the LTR team next week, alongside the nearly 500 registered members and partners attending the conference.” For more information about the Symposium, including registration, visit <https://www.hubzonecouncil.org/event-4597436>.

ABOUT LOGICAL TECHNOLOGY AND RESEARCH

Logical Technology and Research (LTR) is a Maryland corporation with its principal office in Washington, DC. LTR offers over a decade of broad industry and government experience, and a senior leadership team with subject matter expertise developing and supporting IT enterprise solutions in nearly every Federal government agency. LTR project teams work with clients to define business objectives, and then logically apply technologies and research to develop a fully integrated solution to achieve business goals. LTR is committed to combining excellence and experience to our clients, as well as engaging with the professional, civic, and business community.
