email: LTRMarketing@oneltr.com

August 2022, Washington DC - Logical Technology and Research (LTR), a management consulting firm specializing in IT services and solutions for government customers, is pleased to announce LTR President and CEO Todd Rogers has recognized for service and commitment to the community.

Aisha N. Braveboy, Prince George's County State's Attorney, honored Mr. Rogers, a longtime resident of the County, with a citation for his induction into the 2022 Class of the 48 DMV Men of Power for the Washington Metropolitan Area. The 48 DMV Men of Power award acknowledged Mr. Rogers' service and support to others. The citation notes Mr. Rogers has "played a crucial role in helping advance the business, political, and cultural landscape not only in Prince George's County, but nationally and internationally." According to the citation, previous inductees for the honor include recognized leaders across the DMV, including the late DC Mayor Marion Barry and Hall of Fame Announcer Donnie Simpson.

Mr. Rogers began his career in IT shortly after graduating from Ohio University and was lauded for his skills in sales and IT solutions while managing national and regional sales teams for several industry leaders, such as ESRI and Dun and Bradstreet. In 2010, Mr. Rogers founded an IT company, Logical Technology and Research. Over the last 12 years, the firm has provided IT services and management consulting to several Federal government customers. Today, the firm offerings include a full range of technology solutions and strategy for government enterprises including IT modernization, geospatial, artificial intelligence, and cybersecurity.

ABOUT LOGICAL TECHNOLOGY AND RESEARCH

Logical Technology and Research (LTR) is a Maryland corporation with its principal office in Washington, DC. LTR offers over a decade of broad industry and government experience, and a senior leadership team with subject matter expertise developing and supporting IT enterprise solutions in every Federal government agency. LTR project teams collaborate with clients to define business objectives, and then logically apply technologies and research to develop a fully integrated solution to achieve business goals. LTR is committed to combining excellence and experience to our clients, as well as engaging with the professional, civic, and business community.
